Notice the new neckline; no collar in back, with revers in front, bound all around with silk-and-cotton crepe. This same binding finishes the graceful sleeves, makes the sash which ties in back, and is applied in panel effect on the skirt. Fancy net and lace make vestee.

COLORS: Green, peach or orchid, each with white embroidery and trimming; also navy blue or black, each with self-color embroidery and trimming. **SIZES:** 36 to 58 bust. Entire length about 53 inches. Wide hem.....

And we haven't forgotten the pleated frill, so new, so stylish and so flattering to you. Edged with georgette crepe. The long, Tuxedo style revers are held by a strap of self material and mercerized braid frogs.

This stunning Coat of Silk-and-Wool Bengaline comes in two lengths. In the smartest fabric, and lined with all-silk crepe de chine. Cut in the correct proportion whether you are tall or short.

So for the short stout woman, we have this coat in a complete size range, designed so that the hip line, the waistline and the pocket, each comes in just the right place.

And for the tall stout woman, we have the same coat designed with longer proportions for her figure.

The separate skirt, especially of soft material, favors the use of pleats, to best become the figure. With the stout woman, too, pleats are especially popular because of the slender effect they contribute.

Sale of Shoes

LANE BRYANT Stout-Arch Shoes are the development of many years of experience in making and selling shoes.

In our five great Metropolitan Stores, we have fitted the feet of thousands of stout women. We know their requirements exactly, and we offer here all of that experience in making and fitting shoes.

Every shoe pictured in this book has every feature described below. Every shoe was especially designed and especially made just for stout women—just for you.

These shoes will wear better and longer than any shoes you have ever had. They will fit your feet better and make you more comfortable. They are stylish, too—yet they are offered now at very special SALE PRICES.

1. Every Lane Bryant Stout-Arch Shoe is ALL-LEATHER.

2. Every shoe is made on a "combination last" designed by us especially for stout women. See picture "A."

3. Every shoe has a double-steel arch—two pieces of tempered steel riveted together, then imbedded in sole of shoe and again riveted into place. This shank provides strength and is an arch-support feature. See "B."

4. Another arch-support feature—every shoe has an all-leather counter which is appreciably lengthened on the inner side. This extended counter, as used in our shoes, really does support arch. See picture "C."

5. Every low shoe has our famous narrow heel-fitting, and also a non-slip heel lining—which helps to prevent blistering and other discomforts of slipping at heel. See picture "D."

6. The sole of every Lane Bryant Stout-Arch Shoe is genuine Good-year Welt—which means to you a shoe that will not burn your feet—a shoe that can easily be repaired.

7. Every shoe is offered in a greater-than-usual variety of sizes and widths. There are sizes from 4 to 11, each in widths from A to EEE.

How to Order Shoes

With your assistance we know we can FIT you. Nearly every shoe in this book is carried in stock in so great a variety of sizes and widths that we can fit you exactly. Before ordering, please read very carefully the simple instructions printed below.

1. Tell us your correct size and width. If you know your size, you may ignore paragraphs 2 and 3.

2. If you do NOT know your correct size and width, send us with your order a copy of ALL of the numbers and letters appearing within any shoe that fits your foot. This will tell us your size. See sketch at right.

3. If you do NOT know your correct size and width, and if the markings in your old shoes cannot be read, send us a penciled outline of your left foot, being very careful to keep pencil straight up and down all the time (if you let the pencil slant it will spoil the sketch). With this sketched outline of your foot we will send your exact correct size.

If you follow these simple instructions we will send you shoes that FIT; indeed, they will probably fit better than any shoes you have ever worn. And if we fail to do so, we want you to return the shoes in exchange for another size—or we will return your money, as you prefer. We mean just THAT, for we KNOW we can fit you.

"ABDO-LIFT" Reducing Corsets

Patented Abdo-Lift Supporting-Reducing Corset. It supports the abdomen in a different manner from other supporting corsets, and when worn properly it actually reduces the girth from 6 to 8 inches. It may also be worn as a remedial corset for holding up displaced organs and sagging abdomen. The inner belt which is attached to corset, gently lifts the abdomen and holds it in its natural place without discomfort.

Made of Flesh-pink Coutil; flexibly boned; silk embroidery-trimmed top. Attached inner belt of same material. Sewed inside the fabric of the belt there are two thin, lightweight, aluminum plates, exerting a strong but gentle upward and inward pressure. These can be easily bent to cup inward, according to the needs of the figure.

Belt laces with hooks in front, so that it can be easily adjusted to all figures. Corset $2\frac{1}{2}$ inches above waistline. Laces in back. Elastic inserts at top of each side in front. Six garters.

Instructions for Taking Measurements

as Required on All Lane Bryant Garments

In order to give you a well-fitting garment, it is of the utmost importance that you fill in all of the measurements required below. Do NOT specify STOCK SIZES of some former garments you may have purchased elsewhere. Lane Bryant sizes are scientifically designed and are exclusive with Lane Bryant.

DO NOT TRY to take the measurements YOURSELF. Have some friend take them for you. Follow these instructions carefully and be sure to USE AN ACCURATE TAPE MEASURE.

A BUST MEASURE—Take measurement over shirt waist or over your dress (with your corset on). Pass tape measure around the body over the fullest part of the bust, well up under the arms. Do not allow tape to slip down in back; do not take this measurement too tight, and do not make any allowances.

B WAIST BAND—In order to ascertain correct waist measure, tie a tape or string around smallest part of waist, and use this as basis of measurement.

C to B LENGTH OF WAIST, at front from base of neck, C, to waist band, B.

D to B LENGTH OF WAIST, at back from base of neck, D, to waist band, B.

F to C ACROSS BACK—From armhole seam to armhole seam, six inches below base of neck.

H AROUND ARM (around fleshiest part).

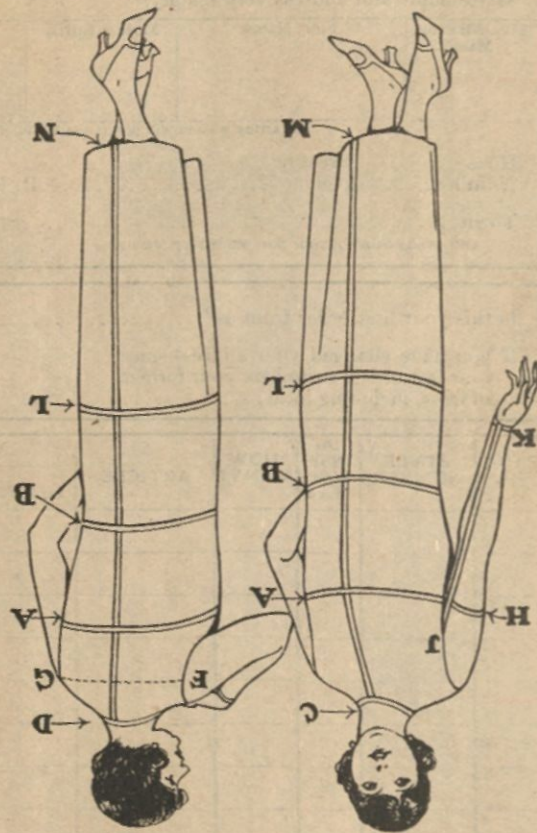

J to K INSIDE SLEEVE—From bottom of armhole to length of sleeve desired.

L AROUND HIPS—Take this measurement around largest part of hips. Not too tight. Make no allowances.

B to M SKIRT LENGTH FRONT (for skirts, suits and petticoats) from waist, B, to desired length of skirt, M.

B to N SKIRT LENGTH BACK, from waist, B, to desired length of skirt, N.

D to N FULL LENGTH BACK—This measurement is required only when ordering dresses. From base of neck, D, to desired length of dress, N.

Give all ACTUAL measurements
Do NOT make any allowances

In ordering Shoes and Millinery be sure to read "How to Order Hats" on page 12 and also "How to Order Shoes" on page 19.
